# The SAY National Clearinghouse

The SAY National Clearinghouse consists of two different types of educational products: formal curricula and other supporting resources and provides their alignment to Agriculture, Food, and Natural Resources (AFNR) Career Cluster Content Standards related to agricultural safety and health.

- AS.02: Animal Systems Career Pathway

- CS.03: AFNR Cluster Skills

- ESS.01: Environmental Service Systems Career Pathway

- ESS.05: Environmental Service Systems Career Pathway

- PS.03 Plant Systems Career Pathway

- PST.02 Power, Structural and Technical Systems Career Pathway

The term **Formal Curriculum** refers to material that: 1) has learning goals or objectives that are clearly stated; 2) includes subject matter content supportive of the learning goals or objectives; and 3) has an evaluation component (for example, some type of student assessment, such as a quiz).

The term **Other Supporting Resource** refers to more individualized, originally authored resources, such as technical fact sheet series, video clips, PowerPoint presentations, or other materials that lack one or more of the three elements of a Formal Curriculum. Both types of materials may be supportive of AFNR Career Cluster Content Standards and can be valuable educational materials for youth agricultural safety and health.
